## Hydraulic/Civil Engineer (m/f/d)

Start your future at CDM Smith!

CDM Smith provides solutions in water, environment, transportation, energy and facilities to public and private clients worldwide. Our European business has over 700 staff and is a market leader in delivering river engineering, flood management and engineering projects.

CDM Smith is seeking to recruit a hydraulic/civil engineer in Dublin to support a range of different types of projects including fish passage improvement, river restoration, flood management, drainage design and hydraulic modelling. We are looking for candidates with practical experience and strong technical skills.

### Requirements

- A degree to preferably MSc level in Civil Engineering or related.
- A minimum of 3 years' experience in hydraulic engineering or related projects
- Design experience on hydraulic engineering projects.
- **Preferred Skills are:**
- Knowledge of the design and implementation of fish passage improvement projects.
- Experience of different stages of project delivery.
- Experience with hydraulic and/or hydrological modelling, e.g. HEC-RAS.
- Experience with AutoCAD and GIS.

### What we offer

- Competitive salary;
- Flexible working options; and
- Excellent benefits

### Contact

Applications (a CV and cover email) from interested candidates should be sent to [dublin@cdmsmith.com](mailto:dublin@cdmsmith.com) before 1st October 2021 and using the reference number **CDM/DUB/21/04**.
